

Sudoku is played over 9x9 grid, in each row there are 9 slots, some of them are empty and need to be filled. Each row, column and "area" (3x3) should contain the numbers 1 to 9 however:

- Number can appear only once on each row
- Number can appear only once on each column
- Number can appear only once on each area (3\*3 slots)

The bottom line: the number should appear only once on row, column or area.
